

REDIAL™ HEMOSTASIS VALVE INTRODUCER

*available in .018" and .038" configurations
and now includes stopcock*

Smooth transition

Radiopaque band
available

Color-coded clamps
for easy identification

GALT's ReDial™ Hemostasis Valve Introducer provides reliable vascular access in a 4cm configuration. Access is gained with the less invasive taper configuration, while allowing for high flow and facilitating de clot procedures. Each sheath is individually packaged.

- .018" configuration offering a less invasive taper configuration
- .038" standard access sheath
- Allows for high flow and facilitation of de clot procedures
- Available with and without radiopaque marker band
- Kink-resistant material with smooth transition

REDIAL™ HEMOSTASIS VALVE INTRODUCER

GALT's ReDial™ Hemostasis Valve Introducer delivers less invasive, high-flow and declot abilities through exceptional tubing design and construction. High-quality, kink-resistant material and large side-arm tubing combine to make GALT's ReDial™ Hemostasis Valve Introducer the premier 4 cm configuration.

Micro-Access ReDial™ Hemostasis Valve Introducer with Radiopaque Marker Band .018"
